

# Magnetic Signs

## Preparation, Use & Care

### Applying the Sign

- 1) Be sure that the vehicle surface and the magnetic side of the sign are clean and dry. (Waxing of both surfaces is strongly recommended.)
- 2) Let one edge of the sign contact the vehicle at the desired position. (Do not apply over molding or sharply curved areas of the vehicle.) Now, simply let the magnetic power do the work as it puts the sign into place.
- 3) Make sure the sign is smooth against the surface of the vehicle, with no air pockets underneath.
- 4) These steps will properly secure your sign. If the sign is not exactly where you want it, repeat step 2.

### Care and Maintenance

- Remove the sign at least **weekly** and wipe dry the magnetic side and surface of the vehicle. This keeps moisture from collecting, which could damage the vehicle's surface.
- Both surfaces of the magnetic sign can be washed with warm water and a mild detergent.
- Be sure vehicle and sign are wiped dry before reapplying.
- Avoid wrinkling by storing on a 3-inch diameter roll with the printed side out, or stored flat.
